

EVENT DATA RECORDER

The secure and compliant way to record critical vehicle data.

Secured

8-32V Working Voltage

ECER169 Compatible

Our **Event Data Recorder (EDR)** is engineered to deliver **secure, tamper-proof event logging** in line with **UNECE R169 requirements**, helping OEMs meet regulatory demands without compromising on cybersecurity.

Designed with a **cybersecurity-first architecture**, our EDR ensures that all critical vehicle event data—such as speed, braking, and signal status—is **accurately captured, securely stored**, and protected against unauthorized access or manipulation.

Seamlessly integrable with OEM systems, it supports **secure diagnostics, data retrieval, and OTA updates**, enabling a future-ready infrastructure for connected vehicles.

Empower your vehicles with transparent, compliant, and cybersecure data recording—built for OEMs shaping the future of mobility.
